HANKOW  
CORKSCREW  
TREE

(Salix Matsudana Tortuosa)

This fascinating horticultural curiosity comes from the Hupeh Province of East Central China. Our photograph shows the dainty fillgree habit of growth when this unusual tree is allowed to grow unpruned. Branches, both large and small grow upward with an exotic corkscrew twist. If you want a horticultural novelty to offer, in order to stimulate orders from new and old customers, we are sure that this charming hardy Oriental tree will do the job for you.

This tree is also known in common parlance as Corkscrew Tree, Corkscrew Willow, or Contorted Hankow Willow.
